📍 Yangon

PROFILE

Detail-oriented and technically adept System Engineer with hands-on experience in server management, data center setup, and cloud services. Possesses a strong foundation in networking concepts, including IP addressing, routing, switching, and network protocols, with practical experience in physical network configuration for data centers. Skilled in configuring Linux servers, deploying websites, and managing cloud-based infrastructure. Proficient in monitoring and maintaining network operations, ensuring system uptime, and troubleshooting technical issues. Eager to leverage expertise in network infrastructure, virtualization, and cloud technologies to contribute effectively to a dynamic technical environment.

EDUACTION

University of Computer Studies Yangon

Bachelor of Computer Science (BCSC) | Dec 2024

WORK EXPERIENCE

SOC Analyst | System Administrator

Cyber Wings | Feb 2024 – Feb 2025

- Monitor and analyze security events using SIEM tools , detecting threats such as DDoS, SQLi, XSS, and brute-force attacks.
- Implement incident response protocols, including IP blocking, firewall rule definition, and mitigation strategies.
- Deployed and managed various servers, including game servers, mail servers, jump servers, SIEM servers, and NAS servers.
- Designed and set up a data center infrastructure, starting from physical networking.
- Installed Proxmox for virtualization, implemented hyper-converged solutions, and prepared the environment for production-level workloads.
- Managed virtual machines, ensuring high availability, scalability, and fault tolerance.
- Configured and managed linux servers for website hosting, including installation, security hardening, and server monitoring with Wazuh.
- Deployed multiple websites with efficient resource allocation, ensuring optimized server performance and uptime.

TECHNICAL SKILLS

- **Programming:** C#, Python, Java, JavaScript, bash scripting.
 - **Networking:** CCNA (Routing/Switching), VLANs, IP Subnetting, TCP/IP
 - **System/Server Admin:** Linux servers, Proxmox, VPS, HAProxy, NAS (iSCSI), clustering, backups.
 - **Cybersecurity:** SIEM, threat detection, Vulnerability Assessments, Incident Report and digital forensics.
 - **Databases:** Mysql, Mariadb , Mongo
-

CERTIFICATIONS

- ISO/IEC 27001:2022 Information Security Associate™
 - Security Blue Team – Network Analysis, Digital Forensics, OSINT, Vulnerability Management
 - ACS Basic Course
-

CTF COMPETITION EXPERIENCE

- 2023: ASEAN Cyber Shield (Indonesia),
 - 2023: ASIS Vietnam (Online),
 - 2023/2024 MCSC, Cybergon
 - 2024: ASEAN Cyber Shield (Vietnam)
-

PROJECTS

1. Za Information Technologies – Provided technical support for POS systems.
 2. Myanmar Link ISP – Data Center Creation and Virtualization.
 3. Sakura Hospital – Storage Project.
 4. Pentesting – Conducted security assessments for e-commerce site.
-
